

PRODUCT DESCRIPTIONS

THE WARMEST

Everwarm Flannel Outcozies All Other Flannel Sheets!

Everwarm® sheets weigh a hefty 5 oz. per square yard, packing 10% more cotton than other flannel sheets, preventing body heat from escaping. A unique shearing process trims the flannel surface, reducing pilling for a smoother, exceptionally soft and plush texture that maintains its velvety feel after repeated laundering.

Made from 100% cotton and available in Queen, King and Calif King sets. Oeko-Tex certified, free from harmful chemicals and allergens. Used also as a lightweight, absor-bent sheet blanket in warm climates.

- Tightly woven design and extra cotton ensure top-tier warmth
- Smoothest: 20% finer yarns and a rare shearing process minimize pilling
- Extra-beefy, durable construction resists thinning over time
- 100% breathable cotton promotes ventilation, wicks moisture and keeps you dry
- Overcut to allow for normal 3-4% shrinkage

THE COOLEST

Easy Breezy Batiste Sheets Feel Like They're Not There!

Easy Breezy sheets are the lightest, coolest, and softest cotton sheets in the industry. A rare batiste weave, historically used in cravats and fine lingerie, provides a unique combination of lightness, softness, smoothness and durability. The non-clingy construction improves ventilation by reducing contact points. Made with ultra-fine, ultra-combed Supima cotton.

- Delicate, ultra-light weave is softer than traditional cotton sheets
- 40% finer Supima yarns promote airflow for enhanced breathability
- Featherlight construction weighs less than half of other 320 thread count sheets
- Best for those who prefer airy sheets rather than full-bodied ones

Made from 100% Supima cotton and available in Queen, King and Calif King sets. Oeko-Tex certified, free from harmful chemicals and allergens.

PRODUCT DESCRIPTIONS

ALL-IN-ONE

Harmony 2-Temp Patented Dual-Temperature Sheets, Exclusively Ours!

Harmony 2-Temp® Comfort Sheets feature a unique combination of warmth and coolness. Ideal for couples with different temperature preferences and individuals experiencing nighttime temperature swings. The warm flannel half traps body heat with millions of insulating air pockets, while the cool percale half allows heat to escape through micro-gaps between fibers to keep you cool.

Made from 100% cotton and available in Queen, King and Calif King sets. Oeko-Tex certified, free from harmful chemicals and allergens. Patented.

- Warm flannel and cool percale in one seamless sheet - sleep better together!
- Warm half: 100% cotton flannel, 20% more cotton than standard flannel sheets
- Cool half: 180-thread count percale, one-third the weight of the warm side
- Versatile positioning of flat and fitted sheets for warm or cool side placement
